THE NATURAL LOOK

PRICE
CATALOG **10/2024**

WHAT IS DUOFUSE?

The extensive garden range includes decking boards in different sizes, colours and designs to give your terrace floor a beautiful appearance and pleasant comfort.

To fence off your garden or terrace, you can choose from different fences, all modular and combinable. The tongue and groove system gives your garden an austere, even look. The slatted fence, on the other hand, is a more modern fence Whiteh a pleasant play of lines. The open fence allows you to be closed off and still keep the open feeling. The privacy slats are the aesthetic solution for enjoying your garden in all privacy.

All articles can be combined perfectly as they are produced from the same raw materials and in the same colours.

WOOD COMPOSITE

Duofuse® wood composite is a mix of wood flour and PVC. Mixing wood flour and PVC gives rise to an extremely strong combination, which reinforces the advantages of both materials while removing their disadvantages.

This durable material is ecological and maintenance friendly. It is available in a traditional wood colour and in modern shades of grey.

ALUMINIUM AND PVC

The garden fences are also available in aluminium and pvc. They are the best investment for finishing off your garden to perfection. The combination of timelessness and ease of maintenance are ideal for decades of carefree enjoyment of your garden.
